Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. Applicant's election with traverse of Group I, claims 1-26 and 49 is acknowledged. The traversal is on the ground(s) that it would not be difficult to examine all three groups. This is not found persuasive because the foamed particles of Group 1 could be made by methods other than those of the claims. Therefore claims 27-48 and 50 are withdrawn from further consideration as not reading upon the elected invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-26 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tusim et al, Corbett et al or Pontiff.

Art Unit: 1711

3. Tusim et al discloses in col. 1 lines 38-51 and col. 11 lines 22-37 foam particles having a bulk density in the claimed range and having good energy absorbing properties. Corbett et al also makes foam particles having a bulk density in the claimed range I col.3 lines 15-26 and in all the rest of their working examples. Pontiff also discloses foam beads having a bulk density within the claimed range incol.10 lines 51 to 63. It would appear that since the references use the claimed amount of blowing agent in their processes of making the foamed particles of the references and would have the same lower loss as is being claimed.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.**
- 2. Ascertaining the differences between the prior art and the claims at issue.**
- 3. Resolving the level of ordinary skill in the pertinent art.**
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.**
